DATE OF INF 25X1X6 SUPPLEMENT TO REPORT NO.

1. The production plan for the Russian Zone for the period 1 July to 31 December 1948, as approved by SMA, is shown in the attached tables. It represents a new policy in that, for the first time, production figures for Soviet AGs have been made available to German government agencies. The figures, originally based on 1944 stop-prices, were revised in accordance with the new legal prices.

Comment: The total production value for the various production groups as proposed by the DWK - see Table I - were approved by the SMA with only minor changes; however, drastic changes were made as to quantities and values of individual items.)

This document is hereby regraded to CONFIDENTIAL in accordance with the letter of 16 October 1978 from the Director of Central Intelligence to the Archivist of the United States.

Comment: In a number of cases, the total value of approved production quantities as shown in Table II is below the production value shown in Table I for the various branches of industry. The DVK may use this surplus as it sees fit, either by increasing the quantities of certain items, or by planning the production of additional items. At the present time, the DVK is working on these secondary surplus distribution plans, which, though they need not be submitted to Koval for approval, will be checked by the appropriate SIA departments.)
